Dear Sir/Madam,

For Immediate Release

RAMELIUS RESOURCES LIMITED

ACN 001 717 540

**ASX RELEASE –MINING RECOMMENCES AT WATTLE
DAM GOLD MINE**

3 June 2008

ASX CODE: RMS

MINING RECOMMENCES AT WATTLE DAM GOLD MINE

The Directors of Ramelius Resources Limited (**ASX code:"RMS"**) are pleased to announce that mining has recommenced at its Wattle Dam Gold Mine in the Spargoville gold/nickel belt located 25 kms west of Kambalda in the Eastern Goldfields of WA.

SUMMARY

A cut back to the open pit has now commenced at Wattle Dam with the mining contract being awarded to Barcon Logistics.

Barcon, who also carried out the first open pit mining development at Wattle Dam, mobilised their fleet last month to the mine site. The construction of essential roads and infrastructure has been completed and ramping down into the open pit for the cut back has now commenced.

This phase of mining is expected to continue until the September 2008 quarter, at which point the Company will commence the underground decline development.

On the basis of the exceptional performance of the previous Wattle Dam open pit mining, the Directors are highly confident that operational results from both the open pit cut back and the underground development will exceed the production identified in the scoping study.
