# 1H'FY25 result

# 1H'FY25 results

- EBITDA of A\$308m (61% margin) was 8%/10% higher vs CGe and Visible Alpha consensus (VA) and up 119% vs 1H'FY2. The variance vs CGe was driven by lower operating costs
- NPAT of A\$170m was a beat vs CGe/VA and up 314% vs 1H'FY24. The variance vs CGe was driven by lower op costs and depreciation.
- Maiden interim fully franked dividend of 3cps (CGe 2cps), equating to A\$34.7m, to be paid 17 April 2025. The dividend represents a payout ratio of 43% of FCF of A\$81m. RMS generated underlying FCF of A\$264m, representing an annualised yield of 17%.
- RMS produced 148koz at AISC of A\$1,699/oz in 1H'FY25 which represented a 19% increase in production and an 11% decrease in AISC vs 1H'FY24.
- Cash/bullion increased by A\$55m over 1H'FY25 after dividend payments of A\$43m, capex of A\$80m and share purchases (SPR) of A\$166m.

#### **Balance sheet**

RMS finished 1H'FY25 with cash/bullion of A\$502m and no debt. Together with its undrawn A\$175m debt facility RMS has total liquidity of ~A\$677m, excluding its holding in SPR worth ~A\$341m at current prices (cost base A\$253m). As at 31 December 2024, RMS had a total of 98.5koz hedged at an average price of A\$3,183/oz out to DecQ'26. Hedges for the remainder of FY25 total 35.5koz at an average price of A\$3,010/oz representing 24% of CGe production over the period.

# FY25 guidance maintained — trending towards top end

- Production guidance maintained at 270-300kozpa at AISC of A\$1,500-1,700/oz.
- 1H production of 148koz at AISC of A\$1,699/oz implies 2H production of 137koz at AISC of A\$1,493/oz to meet the midpoint of production guidance. This sits against CGe of 150koz at AISC of A\$1,384/oz (VA 155koz at AISC of A\$1,335/oz).
- Growth capex guide of A\$20-30m maintained and exploration and guide of A\$40-50m maintained. RMS noted 2H capex remains dependent on the outcomes of the Mt Magnet mine plan anticipated MarQ'25.

#### Upcoming news flow

- Eridanus and Mt Magnet mill expansion studies: MarQ'25.
- Updated Mt Magnet Mine Plan, incorporating Eridanus and mill expansion studies: MarQ'25.
- Rebecca-Roe DFS and FID: SepQ'25.
- Potential FY25 guidance revision following study outcomes and geological model reconciliation for Cue.

Depending on the outcomes of the Eridanus OP/UG and Mt Magnet mill expansion studies, we note the potential for an increase in FY25 growth capex over JunQ'25 (CGe FY25 growth capex A\$31m) but we anticipate most of the capex falling into FY26. We acknowledge this will likely impact CGe FY26 FCF of A\$337m (11% yield) but note this will likely bolster production from FY27 (CGe 168koz, VA 193koz) as we do not currently model an expanded mill scenario at Mt Magnet.

#### Valuation and recommendation

On incorporating the 1H'FY25 result and the mark-to-market value of RMS' holding in SPR-ASX our price target remains unchanged at \$3.20. We maintain our BUY recommendation and highlight RMS' strong FY25E/26E underlying FCF of A\$476m/A\$337m (A\$536m/A \$391m at spot) representing yields of 15%/11% (17%/13% at spot).

#### Sector Coverage

Individuals identified as "Sector Coverage" cover a subject company's industry in the identified jurisdiction, but are not authoring analysts of the report.

#### **Investment Recommendation**

Date and time of first dissemination: February 20, 2025, 22:14 ET Date and time of production: February 20, 2025, 22:14 ET

**Target Price / Valuation Methodology:** 

Ramelius Resources Limited - RMS

Our target price is based on DCF analysis (NPV5%) of the Mt Magnet and Edna May mining operations as well as the Lake Rebecca development project (NPV10%), adjusted for BS items and a nominal exploration value.

#### **Risks to achieving Target Price / Valuation:**

Ramelius Resources Limited - RMS

#### **Financing risks**

As a company in production with income influenced by operating performance, commodity prices and exchange rates, RMS may be reliant on equity and debt markets to fund feasibility studies, expansions and development of new projects. We can make no assurances that shareholders will be able to access these markets without further dilution.

#### **Exploration risks**

Exploration is subject to a number of risks and can require a high rate of expenditure. Risks can also be associated with converting inferred Resources and with a lack of accuracy in the interpretation of geochemical, geophysical, drilling, and other data. No assurances can be given that exploration will delineate Mineral Resources or that the company will be able to convert any Mineral Resource into Ore Reserves.

### **Operating risks**

The company is subject to risks such as plant/equipment breakdowns, metallurgical (meeting design recoveries within a complex flowsheet), materials handling and other technical issues. An increase in operating costs could considerably reduce profitability and free cash generation from the operating assets, which could negatively impact valuation. Further, the actual characteristics of an ore deposit may differ significantly from initial interpretations, which can also materially impact forecast production from original expectations.

#### **Commodity price and currency fluctuations**

RMS is directly exposed to commodity price and currency fluctuations as with any mining company. These fluctuations are driven by many macroeconomic forces, including inflationary pressures, interest rates, and supply and demand factors. These factors could reduce the profitability, costing, and prospective outlook for the business.

# Short-Term Trade Ideas

Research Analysts may, from time to time, discuss "short-term trade ideas" in research reports. A short-term trade idea offers a near-term view on how a security may trade, based on market and trading events or catalysts, and the resulting trading opportunity that may be available. Any such trading strategies are distinct from and do not affect the analysts' fundamental equity rating for such stocks. A short-term trade idea may differ from the price targets and recommendations in our published research reports that reflect the research analyst's views of the longer-term (i.e. one-year or greater) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. It is possible, for example, that a subject company's common equity that is considered a long-term 'Hold' or 'Sell' might present a short-term buying opportunity as a result of temporary selling pressure in the market or for other reasons described in the research report; conversely, a subject company's stock rated a long-term 'Buy' or "Speculative Buy' could be considered susceptible to a downward price correction, or other factors may exist that lead the research analyst to suggest a sale over the short-term. Short-term trade ideas are not ratings, nor are they part of any ratings system, and the firm does not intend, and does not undertake any obligation, to maintain or update short-term trade ideas. Short-term trade ideas are not suitable for all investors and are not tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any securities or strategies discussed herein.
