Managing Director, Mark Zeptner, today said:

“Today, I am proud to announce the operations team has done it again, our second consecutive year of record gold production and cash generation, as we cracked the 300,000 ounce mark for the first time. Just as importantly, we have achieved our fifth straight year of meeting or exceeding both production and cost guidance. This is, and will continue to be, a core value of Ramelius.

In the near term, we are working towards completion of our previously announced transaction with Spartan Resources. We plan to embrace their exploration DNA which led to the discovery of the highest-grade undeveloped gold project in Australia, importantly right in our backyard.

Our combined companies are currently well advanced on integration activities and associated studies in anticipation of Spartan shareholders approving the Scheme and other regulatory approvals being obtained by 31 July.”

Further details will be available in the full June 2025 Quarterly Report due for release later this month.

This ASX announcement was authorised for release by the Board of Directors.
